

Guesstimates for Consulting Interviews

Number of Tinder Users in India

QUESTION

INTERVIEWER:

Estimate the total *number of Tinder Users in India.*

Share your approach and **solution** in the comments down below.

METHODOLOGY

- Distribute the population of India based on ***tiers of cities.***
- Calculate the ***number of people in the relevant age group.***
- Multiply by *market penetration* and *percentage of people using Tinder.*

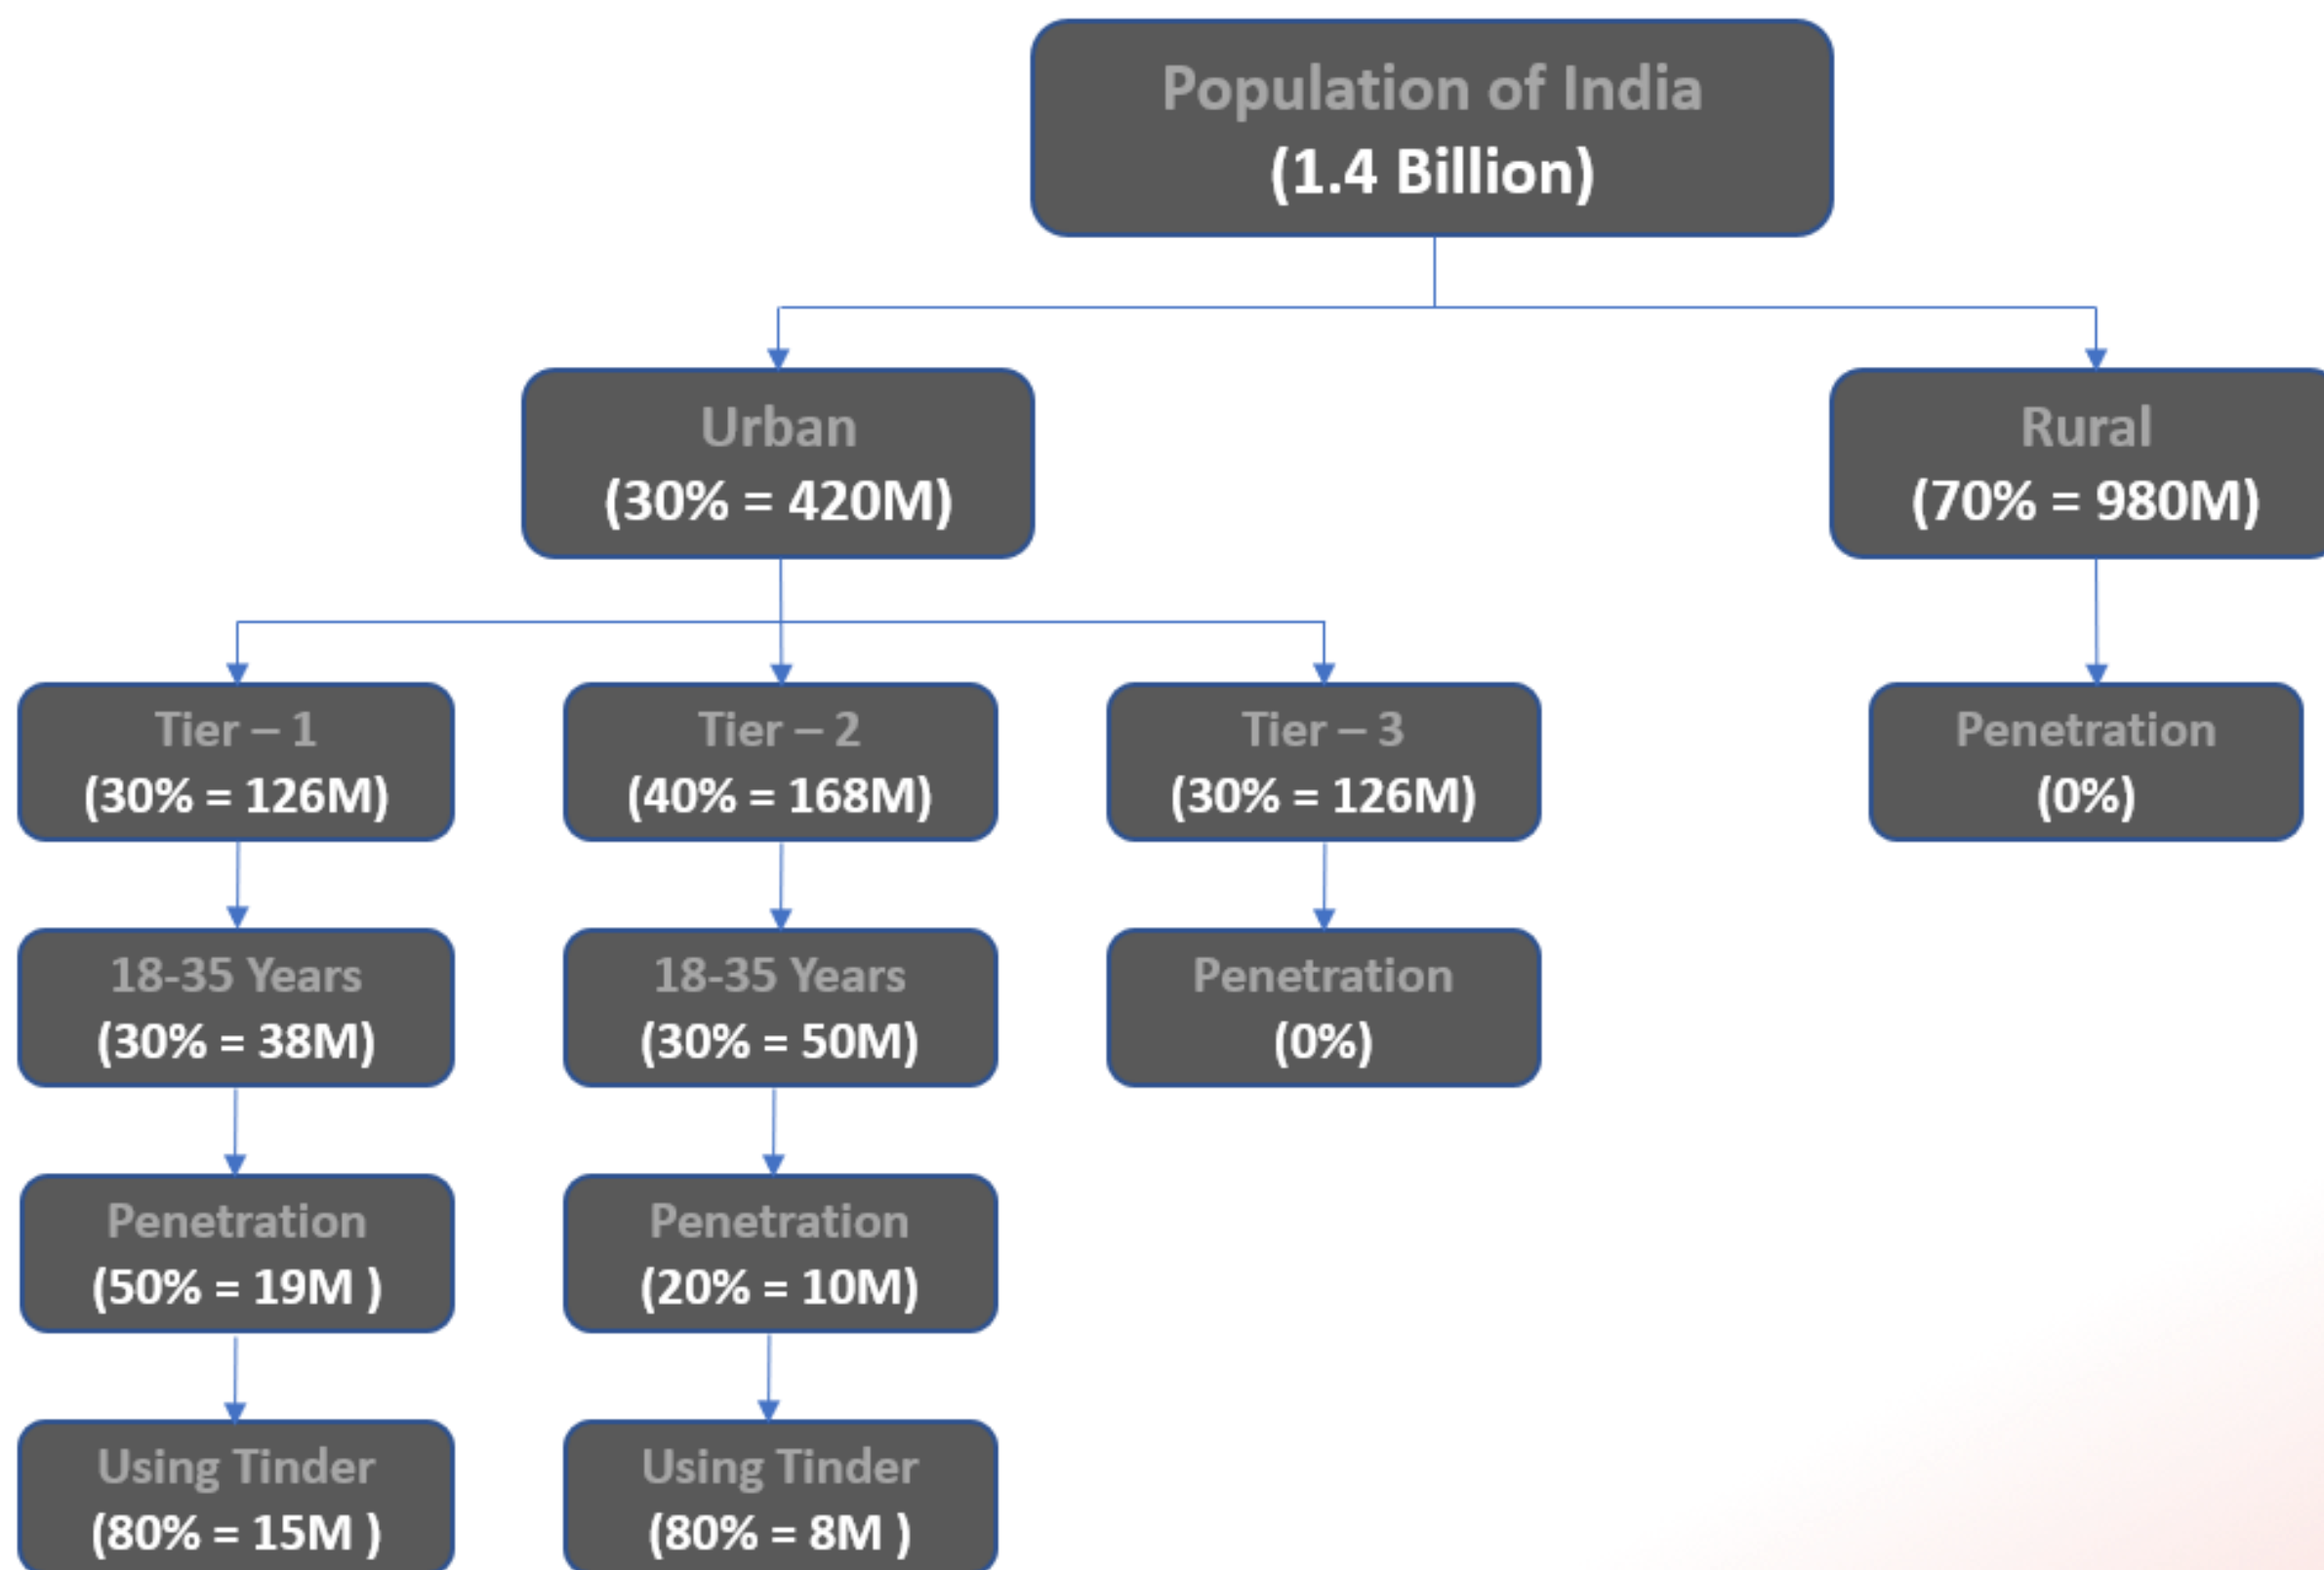

ASSUMPTIONS

- Population of India = **1.4 B**
- Population distribution (Urban)
 - Tier 1 = **30%**
 - Tier 2 = **40%**
 - Tier 3 = **30%**
- Market Penetration:
 - Tier 1 = **50%**
 - Tier 2 = **20%**
- Percentage of people using ***Tinder*** as ***one of the dating apps*** = **80%**

FRAMEWORK

SOLUTION

Number of ***Tinder Users*** in Tier
1 cities in the ***18-35 Age Group***

(Assumed to use dating apps)

= 1.4 Billion * 30% * 30% * 30%
* 50% * 80%

= ***15 M Tinder Users***

SOLUTION

Number of ***Tinder Users*** in Tier 2 cities in the ***18-35 Age Group***

(Assumed to use dating apps)

$$= 1.4 \text{ Billion} * 30\% * 40\% * 30\% * 20\% * 80\%$$

= 8 M Tinder Users

SOLUTION

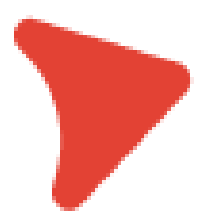

Total number of ***Tinder Users***
in ***India*** :

= Number of Tinder Users in ***Tier 1***
cities + Number of Tinder Users in
Tier 2 *cities*

= 15M + 8M

= ***23M Tinder Users***
